Challenges facing the EAAE:

- Engaging young scientists
- Promote new ideas about agricultural policy, linking scientists, practitioners and policy makers
- Promoting communication and interaction among agricultural economists

What I would like to see achieved in the next Board period (September 2017 – August 2020):

- Continuous reference supporting innovative ideas about the linkage between science and society.
- Enhance the capacity to maintain very professional and positive interaction with all colleagues with the partner organizations and Government counterparts.
- Engaging with issues in an interdisciplinary manner and with an open mind.
- I would be very honoured if I could work with the EAAE anytime.
- Working in Science is always a very positive experience. During the last 35 years I developed technical and managerial capacities, always had an independent and proactive attitude and enjoyed the success of my collaborators.
- I served the IPCC for 15 years, enjoying the collaborative experience every moment. The process in IPCC and in other international work.
