**Challenges facing the EAAE:**

- Making the EAAE a more forceful voice for agricultural economists as a profession
- A more visible presence in Brussels with policy makers through organising a yearly EAAE seminar

**What I would like to see achieved in the next Board period (September 2017 – August 2020):**

- Work to encourage lots of applications to hold seminars and explore new formats, a key service for EAAE members
- Work to maintain the success of the Phd seminars and build on the new software platform to encourage more exchanges among EAAE members especially younger people
- Support greater interest in the various publication awards
- Maintain the success of the EAAE as a low cost, low overhead organisation
