Challenges facing the EAAE:

The key challenge for the EAAE is to provide excellent services for its members in a rapidly changing world, to expand its membership by attracting more young scientists from all over Europe, and to become a more relevant professional association at the global scale.

EAAE needs to enhance its reputation as a forum for top scientists presenting their research as well as to improve communication with policy makers and relevant stakeholders.

What I would like to see achieved in the next Board period (September 2017 – August 2020):

I would like to increase the number of PhD. seminars as well as technical training sessions for general audience organized by EAAE.

I would like to contribute to a better cooperation between EAAE and other professional associations, specifically national associations of agricultural economists, in organizing conferences, workshops, training or policy seminars.
