

Name: Wim VERBEKE

Age: 46 years

Nationality: Belgium

Current position: Professor of Agro-Food Marketing and Consumer Behaviour, Ghent University, Belgium

Research areas:

- Consumer behaviour
- Determinants of food choice
- Agricultural and food marketing
- Food labelling

Education:

- Master of Science in Bio-Science Engineering, Major Agricultural Economics, Ghent University, 1993
- Master of Business Administration in Marketing Management, Vlerick Management School, 1994
- PhD in Applied Biological Sciences: Agricultural Sciences, Ghent University, 1999

Other responsibilities and positions:

- Chairman of the Department of Agricultural Economics, Ghent University (since 2009)
- Member of the Organising Committee of the 12th Congress of the European Association of Agricultural Economists (2008) and of the Programming Committees of several EAAE Seminars (since 2003)
- Member of the ILSI Europe Working Group on Risk Communication (2011-2013)
- Member of the Scientific Advisory Board of the Joint Programming Initiative "A Healthy Diet for a Healthy Life" (JPI-HDHL) (since 2017)
- Member of the ILSI Europe Working Group on Nudging (since 2017)
- Thomson Reuters (Clarivate) Highly Cited Research in Agricultural Sciences in 2015 and 2016

Challenges facing the EAAE:

A major challenge for EAAE is to maintain and strengthen its position as a network and platform where scientists and a wide range of stakeholders related to the agricultural economics profession (e.g. policy makers, regulatory bodies, industry, non-governmental and consumer organisations, and society as a whole) can exchange information, ideas, and visions. More than ever before such networks and platforms will be virtual and global. Another challenge is to maintain and strengthen appeal as an association to young scientists (pre- and post-docs) and young professionals by providing them with opportunities, guidance and support while developing their academic or professional careers, and their academic, research and extension-related skills. Finally, it will be challenging to engage as an association with peers in developing economies, to bridge with

other international and emerging national associations, and to (re-)connect with associations and their members focused on related disciplinary fields. EAAE is in pole position to play a more active role in science communication, dissemination and public debate.

What I would like to see achieved in the next Board period (September 2017 – August 2020):

I would like to contribute to the engagement of more stakeholders, young scientists and professionals; to bridging with established international and emerging national or regional associations; and to (re-)connecting with associations and their members in related disciplinary fields. In line with the position I am applying for, I would obviously like to contribute to further building EAAE as a financially healthy and thriving association that provides the widest possible diversity of benefits to its members.
