The scientific and societal challenges for agricultural economists are huge. As scientists we need to create and share insights on how to transform agri-food systems into sustainable and resilient systems that increase prosperity in Europe and across the globe. The XVII Congress aims at contributions and interactions that can advance the scientific agenda, and at fostering the debate over effective policies and innovative strategies for agri-food system transformations.

We welcome contributed papers and posters as well as organised sessions from all fields of agricultural, food, environmental and rural economics, as well as related disciplines. For further information, visit <https://eaae2023.colloque.inrae.fr>
